I love challenges, I'm a problem solver. My goal is always to learn new things and become smarter in every way. I fear not knowing all the aspects of the work I am doing and it fuels my progress.

I'm currently studying Master of Science in Media Technology. I'm a freelance photographer, full stack web developer and programmer.

My education will help me achieve expertise in a lot of technical fields but my passion will take me further than any education can.

Professional

Dec 2021 -

Significant Bit

Full stack developer, mainly in Rails and Vue.

Aug 2021 -

Education

Aug 2017 -

Master of Science in Media Technology and Engineering

Linköpings University

Jun 2021

Trygga Möten Cert.

2013 - 2016

High School diploma in technology and design

Danderyds Gymnasium, Stockholm

2015

Red Cross CPR Cert.

Languages and other other skills

Swedish, native. English, fluent.

Software skills

I know several programming languages like Python, C++, JavaScript/TS and Ruby. I've worked with databases like MySQL and NoSQL. I am also familiar with Linux, Docker, virtual machines, CI/CD, server management and web hosting.

I can handle programs like Photoshop, Lightroom, Final Cut Pro X, MATLAB and CREO as well as all the Office programs with no issue.
